ActiveCockpit – processing and displaying manufacturing data in real time

The continuous improvement of manufacturing processes requires users to be able to access data quickly and seamlessly. The ActiveCockpit software uses open interfaces to continuously record, process and filter manufacturing data from existing software landscapes and various data sources.

The relevant data is displayed in ActiveCockpit in real time, making it available to everyone at the plant involved in manufacturing (see page 158).

Delivery: 750 x D28L round tube, L = 5600 mm

**Ergonomics, lean production and Industry 4.0 –
the pillars of your success!**

Any company's economic success is built on top-quality products and services that result in the highest level of customer satisfaction. Given this fact, it is only logical that companies strive for continuous improvement across all levels of their operations.

Comprehensive success relies not only on lean, waste-free processes, but also on ergonomically designed work systems that allow employees to do their jobs with no waste. Good ergonomics serves to support the value chain and reduce waste.

The fusion of production IT and enterprise IT, the synchronization of processes, and machines that automatically make decisions in real time all allow for efficient and customized manufacturing.

With MPS, you have a production system that places equal importance on ergonomics, lean production and networking.

For motivated employees, higher productivity and better quality

Ergonomic workstation systems make work easier and keep workers healthier.

Parts supply

The seven ground rules for workplace systems help you lay out and design ergonomic workstations and flow rack systems

The benefits of ergonomically designed workstations: increased motivation and satisfaction, higher performance, efficiency and work quality, as well as fewer absences due to illness. The bottom line: Ergonomics provides you with valuable benefits in the form of higher productivity, increased efficiency, and a decisive edge over the competition – thus ensuring lasting success for your company.

Body height and working height

The optimum working height is based on the worker's body height and the type of activity to be performed. The average optimum working height for average requirements is 1125 mm for sit-down/stand-up workstations.

Work area

The work area should always be between 800 mm and 1500 mm high. Working positions above heart height should be avoided, as should any work below 800 mm, as bending places an undue strain on the worker's body. Ideally, workers should perform dynamic activities with frequent shifts of exertion, such as switching between standing and sitting.

Grab area

All containers, equipment, and operating elements must be easily accessible and located in the anatomical/physiological range of movement for the employee. Torso rotations and shoulder movements, particularly when under exertion should be avoided whenever possible.

Parts supply

All grab distances should be as short as possible. Grab containers and parts containers placed in direct reach of the employee are therefore ideal.

Vision areas

Unnecessary head and eye movements should be avoided. Maintaining objects at a uniform distance to the worker's eyes eliminates the need for refocusing. Avoid joining points that are not visible to the worker.

Lighting

Optimum lighting conditions prevent premature fatigue, improve concentration, and reduce the risk of errors. High contrasts, glare, and reflections should be avoided.

Adjustment of work equipment

Correct adjustment of the equipment serves to minimize required movements, thus reducing physical exertion and employee absences.

Planning aids

Available planning aids include the Ergonomics Checklist (3 842 523 943) the Fit4Ergonomics app and the Planning Template (3 842 542 286/...287). You can then use *MTpro* to do your technical designing.

Lean production for greater productivity and shorter throughput times

Constantly growing cost pressure makes it necessary to permanently increase productivity in manufacturing. One central aspect is the detection and avoidance of waste (Muda).

Waste refers to all process steps that do not directly contribute to adding value. Waste must be constantly avoided. In order to achieve this, the causes of waste must be identified and eliminated.

When analyzing processes, there is a difference between waste and added value. Next, waste is separated into two categories: avoidable waste and unavoidable waste. Waste reduction, once initiated, is a continuous improvement process (kaizen) that impacts all levels of the company.

Overproduction

Overproduction occurs whenever more is produced than the customer ordered – or more than was planned. Overproduction requires additional storage and thus ties up capital.

The seven types of waste

Superfluous movements

Superfluous movements occur whenever a worker needs to travel considerable distance to pick up materials or tools. Unnecessary travel costs valuable production time.

Waiting times

Waiting times occur whenever a worker needs to wait for materials or for a process to end. During this time, the worker is tied up and does not contribute to adding value.

Transports

Transports occur whenever a forklift or lifting truck/crane is used to transport materials through production. Transports change the position of the product, but not its value.

Overprocessing

Overprocessing occurs whenever production exceeds the standard that the customer requires. More is invested in the process than is required to fulfill the function.

Stocks

High stocks in production, as well as in the raw material and finished goods warehouses, cost money. The stocks provide a feeling of security, but they also make the product more expensive.

Faults

If parts are not in the proper condition, they are classified as faulty. Faults require reworking and sorting, which results in increased costs.

MPS – a complete, ESD-protected system

ESD is caused by electric charges that are generated by friction between various materials or by the influence of electric fields. These charges can generate up to 10,000 V.

Protection of ESD-sensitive components

Components sensitive to electrostatic discharge are known as ESDs (electronic static discharge-sensitive devices). Damage to these components generates considerable cost. Damage leads to an irreversible change in the device and a reduction in the ESDs' service life. Dangerous component voltages have an effect on ESDs sensitivity.

The most effective way to reduce ESD is to simply avoid electric charges or to conduct carried charges safely. Rexroth's ESD program, with ergonomically designed components, will assist you in designing a production system that avoids electrostatic discharge. With suitable materials and connection technology, the components in the ESD program are either electrostatically conductive or deflective and create a fully protected system.

To ensure and maintain the ESD-conductive properties, we recommend checking conduction resistance at regular intervals after assembly.

Rexroth components fulfill the requirements for the protection of ESDs (DIN EN 61340-5-1). The individual national personal safety regulations must be observed during assembly and connection.

▲ **Defined grounding to an ESD-safe structure serves to make the entire system both safe and economical.**

Plan assembly lines that are ergonomic, lean, fast, and safe with *MTpro*

Careful and comprehensive planning is the only way to cost-effectively integrate ergonomics and lean production into the production system.

Ergonomic workplace systems help to keep workers both healthy and productive. What's more, they create the foundation for implementing lean production concepts and for improving the economic efficiency of companies. Adapting production systems to ergonomic and lean production requirements after the fact is cost-intensive. As product life cycles and unit production numbers

continue to shrink, so does the time left for planning. This is where *MTpro* (3 842 539 057) can provide valuable support. This planning software is designed with both needs in mind and offers good visualization as well as a CAD interface.

MTpro ManModels make it possible to integrate workstation ergonomics as early as the planning stage

Multiple workstations are linked to form a production line that follows lean production principles

Users without CAD experience can use this software to design workstations, flow rack systems, manual linking sections and material shuttles with a click of the mouse. The user-friendly system allows users to create their designs by either using a guided parameter selection system for configurable products or by assembling various discrete components. A comprehensive set of rules covers the design logic, all product dimensions and the necessary information on accessories.

The ManModel is yet another ergonomic highlight. With this feature, *MTpro* can optimize designs for human use. Based on the dimensions of the human body, the ideal grab area, the proper distance from work equipment, and the proper angle of vision can be easily visualized and the production systems then designed.

Users can then rapidly retrieve complete parts and order lists, price calculations and CAD data.

Ergonomic workstations for greater productivity

Workstation design must focus equally on the worker and on the product being manufactured – this is the only way to maximize productivity and profitability.

Incorrect posture at the workplace can result in a waste of up to 40% of a person's potential performance. The price paid for deficiencies in workplace design is measured in the high physical input needed to compensate for them. And such input is power and energy that would better be dedicated to the actual job at hand.

Add to this the fact that our society is steadily aging and it becomes clear that early investment in proper workplace equipment is essential for maintaining productivity and competitiveness over the long term. This is the only way to help prevent chronic conditions, such as back pain, from arising in the first place.

The first step is to examine the product and what is needed to assemble it and from there to define the work table dimensions and how material is to be supplied to the worker. Once this is done, the focus shifts to the worker and ergonomic design of the workstation begins. This will include looking at optimum tool positioning and information provision, but also at additional items such as footrests and proper lighting, key elements for an ergonomic, and hence efficient, workstation. In order to maintain a well-organized workstation and to securely stow small parts that are not always needed, the last step is to complement the 5S elements with storage cabinets.

Rexroth's height-adjustable workstations go a step further than the competition by making the height of the material supply area and that of the working surface independently adjustable. The height of the workstation is determined by the worker's height and the product height, i.e., the work area. The height of the material supply area, on the other hand, is primarily determined by the worker's height, since their optimal grab area must be taken into account.

All workstations and workstation accessories are available in an ESD-conductive version.

Rexroth workstations are available as complete systems, as modules or as individual components. Variable dimensions and equipment features allow you to customize and adapt the workstations to your specific requirements.

Workstations

Workstation design must take account of the product itself, the process required for that product, and the actual human being doing the work. The design must give equal priority to the minimization of process waste and to providing employees with an ergonomic work environment.

This is why geometry and functionality are important in the layout of the workstation. The product being fabricated and the person doing the work are the benchmarks in defining the workstation height, width and depth as well as for positioning lighting and material supply equipment. Support accessories such as information boards are then added to ensure that the right information is available at the right place.

Ergonomics

A basic facet of workstation design involves the encouragement of alternating, dynamic activity. Static activity inhibits blood circulation and oxygen supply to the muscles. Alternating physical exertion reduces stress on the employee and increases performance. Alternating exertion is seen, for example, where combined

stand-up/moving or sit-down/stand-up workstations are integrated into the workflow. Many workstations are used for multiple shifts. This means that these workstations need to be designed for employees of different height. The optimum working height is based on the body height range and the type of activity to be performed. If you take all body heights into consideration, the average optimum working height for average requirements is 1125 mm for sit-down/stand-up workstations. The ability to separately adjust the material feed height and the working height means that these height-adjustable workstations can be adapted to both different products and different workers. This is the key to creating an ergonomically optimized workplace. Information on further aspects of ergonomic workstation design, such as the optimal grab area or recommended working heights, is available in our Ergonomics brochure (3 842 523 943).

Work contents	Working heights			
	Group 1	Group 2	Group 3	Group 4
High standards for Visual inspection Fine motor skills	1100	1200	1250	1350
Moderate standards for Visual inspection Fine motor skills	1000	1100	1150	1250
Low standards for Visual inspection High standards for Freedom of arm movement	900	1000	1050	1150

Average optimal working height = 1125

MTpro For workstation design and planning, we recommend **MTpro!** See pages 12 and 13 for more information.

Height-adjustable workstation

00136613

- ▶ Large number of adjustment options for high versatility
- ▶ Freely selectable geometry and functionality
- ▶ Independent adjustment of material feed and table top heights
- ▶ Available as ESD-conductive version
- ▶ Fully assembled or as a kit for self-assembly
- ▶ Allows for the addition of any desired modules, including cross ties and conveyor tracks as well as individual components

For workstation design and planning, we recommend MTpro! See pages 12 and 13 for more information.

See technical data (page 192)

Height-adjustable workstation		3 842 998 350
A	Design	Disassembled, assembled

00131998

Height-adjustable workstation components

Lifting module (A)

- ▶ Lifting module for continuous workstation height adjustment
- ▶ Connected via screw hole on face sides or using the integrated 10 mm slot
- ▶ Lifting force: max. 1000 N per lifting module; suitable for compressive forces only
- ▶ Lift: 410 mm
- ▶ Lifting velocity: 25 mm/s
- ▶ Cable length: 2000 mm

See technical data (page 193)

00139013

34243

	No.
A1 Lifting module	3 842 540 116
A2 Lifting module with bracket (Z)	3 842 542 211

Control (B)

- ▶ Control for synchronization of 1, 2, 3 or 4 lift modules in parallel operation
- ▶ Operating time: 10%

Hand switch (C)

- ▶ For operating the controller, with push button for height adjustment and 3 memory buttons to store the different positions, cable length 3 m

Contact bridge (D)

- ▶ For operating the controller without collision protection

Mains cable (E) (not shown)

- ▶ For connection to power mains

Pressure wave control strip (F), pressure wave sensor (G)

- ▶ A pressure wave control strip (F) can be connected to the control unit (B) to protect against mechanical collisions. Even if only slight pressure is applied to the pressure wave control strip, the pressure wave sensor (G) sends a signal to the control unit and the lift modules move a few millimeters in the opposite direction. The pressure wave control strip has a self-adhesive rear side and can be individually shortened.

Table frame (A, B)

- ▶ Table frame of standard dimensions for box or desk type workstation construction
- ▶ Height-adjustable leveling feet to compensate for floor irregularities
- ▶ Suitable for the construction of ESD workstations
- ▶ Many extension options with accessories such as table tops and footrests
- ▶ Desk type construction for more legroom, especially when swiveling into/out of workstation while seated

Strut extension (C)

- ▶ Strut extension of standard size for attaching accessories to workstations
- ▶ Subsequent installation on a table frame is possible
- ▶ Fits all Rexroth table frames with 45x45L profile and 990 mm width
- ▶ Fastened by means of end connector on table frame
- ▶ Suitable for the construction of ESD workstations

Table top

- ▶ Table top for use in constructing Economic and Basic type Rexroth workstations for various mechanical loads
- ▶ Can be configured with variable dimensions or with fixed standard dimensions
- ▶ The Economic table top is suited for normal levels of mechanical stress on the table top surface
- ▶ The Basic table top with hard laminate coating is suited for high levels of mechanical stress on the table top surface
 - High abrasion resistance
 - High impact resistance and scratch resistance
 - Resistant to organic solvents, weak acidic and caustic materials, gasoline and oil
 - Briefly resistant to temperatures up to 180 °C
- ▶ Available in ESD-conductive version. Safe conduction (without extra wiring) of charges through volume conductive base material $R_{gp}/R_{pp} = 10^4 \dots 10^9 \Omega$ (DIN EN 61340-5-1)

Material shelves

- ▶ Material shelves for ergonomic accessibility of containers (Kanban), materials, measuring instruments and other aids at Rexroth workstations
- ▶ For implementing the 2-bin system
- ▶ Can be attached at any desired incline, height or offset
- ▶ Material shelf Economic (**A**) with frame profile 22.5x30
- ▶ Material shelf Basic (**B**) with frame profile 22.5x45 with docking aids for easy loading and removal of materials
- ▶ Plates
 - PP: light gray
 - SB: ESD-conductive; black; recommended accessory: ESD mat insert
 - Aluminum: for heavy loads (material shelf Basic)
- ▶ Attachment fixed with brackets (included) or swiveling with swivel fastening
- ▶ Customized assembly possible from individual components (see “Components” chapter)

$B_E =$	B - 45 - 80	(P = 40L)
$B_E =$	B - 45 - 90	(P = 45L)

Rubber profile

- ▶ To avoid hard abutting edges, for instance when setting down impact-sensitive products
- ▶ As a footrest: Clip in from top and front on the cross strut of the workstation
- ▶ Very simple and inexpensive
- ▶ Suitable for the construction of ESD workstations

Material: EPDM; conduction resistance $R_{gp} < 1 \times 10^9 \Omega$

Footrest Economic

- ▶ For 0–7° inclination
- ▶ For low-fatigue sitting at the workstation
- ▶ Attachment to the table frame for box or desk type
- ▶ Oil-resistant
- ▶ Aluminum U-profile on front edge to prevent premature wear of the footrest edge
- ▶ Suitable for the construction of ESD workstations

Material: Chipboard, hard-coated; conduction resistance $R_{gp} < 1 \times 10^9 \Omega$ (DIN EN 61340-5-1)

Scope of delivery: includes fastening material (10 mm slot)

ESD scope of delivery: includes fastening material and grounding cable (10 mm slot) (see page 62)

See technical data (page 195)

Footrest Basic Support frame

Footrest Basic

- ▶ With fixed inclination of 5°
- ▶ For low-fatigue sitting at the workstation
- ▶ Easy height adjustment while seated (adjustment range: 250 mm)
- ▶ Installed on table frame using attachment kit
- ▶ Installed on free-standing support frame using attachment kit
- ▶ Oil-resistant
- ▶ Suitable for the construction of ESD workstations

Frame material: Aluminum profile; anodized

Rest material: Chipboard, hard-coated; conduction

resistance $R_{gp} < 1 \times 10^9 \Omega$ (DIN EN 61340-5-1)

Scope of delivery: includes fastening material (10 mm slot)

ESD scope of delivery: includes fastening material and grounding cable (10 mm slot) (see page 62)

Applications

Suspension profile application

- ▶ To provide ready access to plastic grab containers and trays at the workstation or in the material shuttle
- ▶ Customized assembly from individual components (cf. “Components” chapter. see page 176)

See technical data (page 196)

Hanger application

- ▶ For the ergonomic supply of tools in combination with trolley or slide hanger and spring pull
- ▶ For hanging system lamps at the workstation
- ▶ Customized assembly from individual components (cf. “Components” chapter. see page 176)

See technical data (page 197)

Spring pull

Spring pull (A, B)

- ▶ Ergonomic positioning of tools, e.g., screwdrivers, to reduce uneven and high strain on workers
- ▶ The bearing load and cable length are adjustable
- ▶ Assembly at workstation with hanger and trolley or slide hanger

Scope of delivery: includes safety wire

Spring pull with retractable cable (C)

- ▶ Ergonomic positioning of air-powered tools, e.g., pneumatic screwdrivers, to reduce uneven and high strain on workers
- ▶ Compressed air supplied via air bar
- ▶ Compressed air connection for feed line and tool connection: G1/4"
- ▶ The bearing load and cable length are adjustable
- ▶ Assembly at workstation with hanger and trolley or slide hanger

Scope of delivery: includes safety wire, connection tubing G1/4"

	Bearing load (kg)	System weight (kg)	Retractable cable (mm)	No.
A Spring pull	0.4 ... 1.0	0.6	1600	3 842 520 053
	1.0 ... 2.0	0.6	1600	3 842 520 054

C Spring pull with retractable cable	1.2 ... 2.5	1.4	1350	3 842 520 056

Air bar (A)

- ▶ Distributor and connection point at workstation for compressed air for up to 4 tools
- ▶ Max. 8 bar
- ▶ Compressed air connection for feed line: G1/2"
- ▶ Compressed air connection for discharge: G1/2" or G1/4" (reducing adapters)

Material of seals: NBR

Scope of delivery: includes fastening material for 10 mm slot

	No.
A Air bar	3 842 352 088

Spiral hose (B)

- ▶ For connecting tools to the air bar
- ▶ Hose connection with kink protection, rotatable with sealing ring; 1/4" external thread
- ▶ Max. extension length 2200 mm
- ▶ Operating pressure: P_{max} = 8 bar at 20 °C
- ▶ Requires de-oiled air

Hose material: PU; blue

Connection material: steel

	No.
B Spiral hose	3 842 544 790

34138

**Tool shelf
Tool holder**

- ▶ Tool shelf available with a fixed width of 230 mm
- ▶ For ergonomic and handy positioning of tools at the workstation
- ▶ Tool holders are hung in the tool shelf.
- ▶ Customized assembly of individual components: see “Components” section (page 176)

Tool holders

- ▶ For ergonomic and handy positioning of tools at the workstation
- ▶ Time savings of 10% to 20% based on MTM, achievable with
 - Defined place for fast retrieval
 - 45° docking aids in bucket-tray for easy, ergonomic depositing and removal of tools
 - 45° tilt of tool holder for easy picking
- ▶ Round and oval bucket-trays, open or closed base, for insertion in matching tool holders
- ▶ Four different positions possible for oval bucket-trays in tool holders for ergonomic picking and placing
- ▶ Tool holder to hang in a suspension profile or container mount
- ▶ Tool holder with space for adhesive label

Material: PA 6; black

- ▶ Self-assembly elements for custom configurations of tool holder shelves: see “Components” section (page 176)

Container mount

- ▶ Container mount for mounting tool holders, grab containers, grab trays and grab ledges
- ▶ Suitable for 8 mm and 10 mm slots

Material: PA 66; black

Scope of delivery: includes fastening material for fastening in 8 mm and 10 mm slots

21422

21431

	ESD	No.
Container mount	10	3 842 544 797

D95 tool holder

- ▶ Quiver-type tool holder for nut runners up to 2 kg (the use of a spring pull is recommended for heavier nut runners, see page 31)
- ▶ Time savings of 10% to 20% based on MTM, achievable with
 - Defined place for fast picking
 - 45° docking aids for easy, ergonomic depositing and removal
- ▶ Tool holder open at bottom. This makes it possible to hold nut runners with long tool inserts. Dirt does not collect in the quiver
- ▶ Notched housing for clearly defined stowage
- ▶ Centering lugs for easy fastening in vertical 10 mm slot

Material: PA 6; black

Scope of delivery: includes fastening material for fastening in 10 mm slots

ESD No.	
D95 tool holder	3 842 544 772

50 mm tape tool holder

- ▶ Tool holder for tape dispenser with a width of 50 mm
- ▶ Time savings of 10% to 20% based on MTM, achievable with
 - Defined place for faster reaching and picking
 - Docking aids for easy, ergonomic depositing
- ▶ Supports 5S principles for order and cleanliness at the workstation via defined, fixed place

Material: PA 6; black

Scope of delivery: includes fastening material for fastening in 8 mm or 10 mm slots

ESD No.

50 mm tape tool holder

3 842 555 673

L105 tool holder

- ▶ For ergonomic and handy positioning of tools at the workstation
- ▶ Universal use possible, e.g., for screwdrivers, pliers, or hammers
- ▶ Mounting in 8 mm and 10 mm slots
- ▶ Time savings of 10% to 20% based on MTM, achievable with
 - Defined place for fast retrieval
 - 45° docking aids and tactile feedback for easy depositing

Material: PA 6; black

Scope of delivery: includes fastening material for fastening in 8 mm or 10 mm slots

	 ESD No.
L105 tool holder	10  3 842 544 768

30x30 guide plate

- ▶ 30x30 guide plate as cap for 30x30 profile
- ▶ For the construction of supply racks (minomi racks) for the simple suspension of tools and parts between 30x30 profiles
- ▶ Yellow coloring for faster recognition by workers
- ▶ Time savings of 10% to 20% based on MTM, achievable with
 - Defined place for fast retrieval
 - 45° docking aids for easy depositing

Material: PA 6; yellow (RAL 1003)

Scope of delivery: includes headless setscrew for added stability

		No.
30x30 guide plate	10	3 842 544 770

Workstation lighting

The right lighting, adapted to the activity at the workstation, is a basic prerequisite for high efficiency and processing quality. Optimal lighting prevents fatigue, improves concentration, and performance, and reduces the number of errors.

In addition to climate, noise, mechanical vibrations, and hazardous substances, lighting is another environmental factor that must be taken into consideration.

Important aspects for planning workstation lighting include:

- ▶ Avoiding strong contrasts
- ▶ Avoiding glare and reflection

DIN EN 12464 or the table below contain the required mid-range lighting strengths.

The right Rexroth system light for every task

Sample calculation for work top lighting

Rexroth SL 78 (nominal lighting strength) with 681 lux
 (with lamp–table top distance = 1.25 m)
 + 300 lux ambient light
 = 800 lux work top lighting

Tasks	Required lighting strength (lux)	Rexroth SL 48	Rexroth SL 36 Duo/SL 15 LED Duo	Rexroth SL 20 LED	Rexroth SL 78/SL 30 LED	Rexroth SL 78 + SL 36 Duo/SL 30 LED + SL 15 LED Duo
Rough and medium machine and assembly tasks such as turning, milling and planning	300	■ ¹	■ ¹	■ ¹		
Fine machine tasks with permissible deviations	500	■■■■ ¹	■ ¹	■ ¹	■ ¹	
Fine assembly tasks, e.g., telephones, winding medium-sized coils, marking, inspection and measuring stations	750		■■■■ ¹	■■■■ ¹	■ ¹	■ ¹
Very fine assembly, e.g., measuring instruments, assembly of tools, gages, and equipment, precision mechanics and micromechanics	1000				■■■■ ¹	■ ¹
Assembly, inspection and adjustment of extremely small parts	1500					■■■■ ¹

¹ Distance between the table top and lamp: 1.25 m

- Lamp lighting strength sufficient for task
- Lamp lighting strength + ambient light (300 lux) sufficient for task

See technical data (page 199)

Rexroth's system lamp range provides glare and flicker-free light of the highest quality. You can operate the lamps as required for the job at hand either individually or in combination with one another.

This allows you to provide your workstations with uniform illumination of outstanding quality. The lamps can be switched on and off when plugged into a socket with a power switch.

The lamps can be connected in series using the connection cables. The ready-to-use connection and mains cables allow you to install the lamps yourself without needing an electrician. The lamps are suitable for use at ESD workstations.

Lighting on a new level: LED system lamps

The design of the LED lamps sets itself apart by combining parabolic louvers and diffuser foil.

The use of LEDs for lighting makes possible low energy consumption, long life and maintenance-free lamps. Staff members can adjust the lighting strength that they need to match their age using a controller. Using this controller, it is possible to dim the lighting strength.

Increased efficiency with Rexroth system lamps

Reduction of errors with Rexroth system lamps

Fluorescent lamp with electronic lamp ballast

LED lamps (Fig. 4 including controller)

LED system lamps

- ▶ Glare-free light thanks to the combination of a parabolic louver and diffuser foil
- ▶ 60% energy savings compared to conventional workstation lighting
- ▶ Color temperature: 5000 K
- ▶ With GST connecting socket (black = 230 V; blue = dimming), 1–10 V interface
- ▶ Service life: EU: 60000 h, USA/CDN: 50000 h
- ▶ Suitable for use at ESD workstations
- ▶ SL 30 LED: Attached to a strut extension (workstations with B = 990 mm) or to a hanger (workstations with B ≠ 990 mm)
- ▶ SL 20 LED: Mounting to a hanger
- ▶ SL 15 LED: Mounting to the vertical strut or the strut extension

IP rating: IP 20 (DIN EN IEC 60529)

Housing material: Aluminum; anodized

Scope of delivery: includes fastening material (10 mm slot)

Required accessories: mains cable or connecting cable (see page 48)

Armrest

Armrest (A)

- ▶ Soft support pads protect wrists and arms
- ▶ ESD version: Conductive. ESD conductivity can be reduced by UV rays, heat, wear and chemicals. A yearly check is recommended.

Material: flexible PUR foam; black

Required accessories: double-sided tape (copper tape for ESD version) for fixing to table top

Adjustable armrest (B)

- ▶ Relieves arm strain during assembly work
- ▶ Fastened to table frame; suitable for all Rexroth box-type workstations

Pad material: flexible PUR foam; black

Scope of delivery: includes fastening material (10 mm slot)

Armrest with pad (C)

- ▶ Relieves arm strain during assembly work
- ▶ Hinges allow precisely controlled movements
- ▶ Clamp attachment to table top
- ▶ ESD version for use at ESD workstations

Pad material: leather; white

ESD pad material: leather; black

	ESD	No.

		3 842 515 525

Keyboard shelf

- ▶ For secure, space-saving stowage of keyboards and computer mice at the workstation
- ▶ Suitable for optical and ball mice
- ▶ Keyboard shelf (separate) **(A)** for self-assembly
- ▶ Liner mat **(C)** for an extra non-slip surface

Material: sheet steel; powder-coated; RAL 7035 light gray
Liner mat material: EPDM

Pull-out keyboard shelf with rail (B)

- ▶ Pull-out keyboard shelf with rail for installation underneath a table top
- ▶ Suitable for table frames with profiles:
 - 40x40: B ≥ 926 mm; T ≥ 518 mm
 - 45x45: B ≥ 946 mm; T ≥ 523 mm
 - 60x60: B ≥ 1008 mm; T ≥ 538 mm
- ▶ Liner mat **(C)** for an extra non-slip surface

Keyboard shelf material: sheet steel; powder-coated;
RAL 7035 light gray

Pull-out rail material: aluminum

Liner mat material: EPDM

Scope of delivery: includes fastening material for mounting underneath the table top

	ESD	No.
A Keyboard shelf (separate)		3 842 546 750
B Pull-out keyboard shelf with rail		3 842 544 793
C 651x197x2 liner mat		3 842 546 751

TFT monitor bracket

- ▶ TFT monitor bracket **(A)** with VESA hole pattern (75x75 mm and 100x100 mm) for mounting a TFT monitor on a 45x45L profile
- ▶ Swivel range: 70°
- ▶ TFT monitor bracket with supporting arm **(B)** can be swiveled and horizontally adjusted. Enables ergonomically ideal positioning of the screen.

Scope of delivery **A**: includes fastening material (10 mm slot)

Scope of delivery **B**: includes supporting arm (45x45L profile, DesignLINE joints); includes fastening material (10 mm slot)

	No.
A TFT monitor bracket	3 842 539 840
B TFT monitor bracket with supporting arm	3 842 539 806

Supporting arm

- ▶ For space-saving positioning of a monitor or material container at the workstation
- ▶ Multiple hinges

Scope of delivery: includes fastening material (10 mm slot)

Keyboard shelf

- ▶ Extendable
- ▶ Suspends on supporting arm

Mouse holder

- ▶ Suspends on supporting arm

	No.
A Supporting arm	3 842 521 970
B Keyboard shelf	3 842 522 305
C Mouse holder	3 842 522 130

Ergonomic mat

- ▶ Elastic ergonomic mat cushions employees' movements, reduces strain and protects joints
- ▶ Improved circulation reduces fatigue
- ▶ Use at stand up/moving workstations and machines

Material: PUR (without CFCs), ESD
 $R_{gp} < 1 \times 10^9 \Omega$ (DIN EN 61340-5-1)

	ESD No.
Ergonomic mat	 3 842 544 789

Components for ESD applications

Set of grounding components (A)

- ▶ For defined grounding of ESD workstations
- ▶ Conduction resistance $R = 1 \times 10^6 \Omega$ (DIN EN 61340-5-1)

Scope of delivery: includes fastening material (10 mm slot)

Grounding cable (B)

- ▶ To create defined conductive paths between strut profiles to protect ESD-sensitive components
- ▶ Total length 1200 mm

Scope of delivery: includes fastening material
(10 mm slot/10 mm slot)
(10 mm slot/8 mm slot)

	ESD	No.
A Set of grounding components	⚡	3 842 522 087

G Connection piece	10	⚡ 3 842 516 905
M6 T-nuts for 10 mm slot	100	3 842 530 285

Damping ring (C)

- ▶ Insulates frames from conductive floors, protects floors and prevents vibrations from being transmitted.

Material: PUR; resistant to oils and organic solvents

Color: natural

Shore hardness A: 70–80

Potentialfix (D)

- ▶ For defined grounding of surface elements such as side panels.

Conductive mat insert (E)

- ▶ To protect ESD-sensitive components
- ▶ To create a safe conductive connection, e.g., to ESD material shelves, we recommend using adhesive copper tape.
- ▶ Bleeder resistance $R_{gp}/R_{pp} = 10^4 \dots 10^9 \Omega$ (DIN EN 61340-5-1)

Material: natural rubber

Thickness: 2 mm

Wrist band (F)

- ▶ Wrist band (F) with connection piece (G) for defined grounding of people and protection of ESD-sensitive components

Required accessories: M6 T-nuts for 10 mm slot

Shorter grab distances make for faster assembly

The ergonomic positioning of parts is the key to an efficient workstation.

Unnecessary movements add no value and are therefore wasteful. They consume valuable production time and place an additional strain on the worker. This is why all grab distances should be as short as possible.

Grab containers and parts containers placed in direct reach of the employee are ideal. The containers should be arranged to allow for a flowing, ascending arch sequence of motions based on the body's natural movement.

Moreover, two-handed grabbing and joining can cut assembly time by up to 50%. The ergonomic design of the grab containers based on MTM (Method of Time Measurement) serves to effectively pre-separate the parts: the grab ledges have ridges to enable quick and secure part picking.

Vario grab containers

For space-saving and ergonomic supply of small parts such as nuts and screws. Vario grab containers are stackable. They are mounted on strut profiles or on a base placed directly on the work surface.

Plastic grab containers

These plastic grab containers are sturdy and robust. The containers can be exchanged easily. This allows for very fast order picking, part replenishment and workstation conversions. When used in combination with the material shelves at the workstation or in the material shuttle, these grab containers are suited for implementing the two-bin system (Kanban). An ESD-conductive version of the grab containers is also available.

Lettering clips for content labeling are included as accessories. Container mounts and the grab container rack are also available for optimally positioning the plastic grab containers.

- 66 Vario grab containers
- 67 Hoppers
- 68 Grab containers
- 69 Grab trays
- 69 Container mount
- 70 Lettering clip
- 70 Grab container rack application
- 71 Grab ledge

00127270

00139000

Vario grab containers

- ▶ Small parts such as nuts and screws placed within easy reach on the workstation
- ▶ Quick and secure grabbing due to ergonomic grab ledge design based on MTM (Method of Time Measurement)
- ▶ Sturdy, compact stacking for reduced space requirements
- ▶ Vario grab containers in three standard sizes (**A**)
- ▶ Assembly elements for custom configurations (aluminum material chute (**D**) + plastic grab ledge and refill end-pieces (**C**)) for varying volumes and quantities
- ▶ Grab container base (**B**) for ergonomically ideal arrangement of grab containers with short grab distances; mounted directly on work top or on strut profile
- ▶ For offsetting grab containers in a stack: M5 sliding block (6 mm groove) and DIN 7984 M5x6 screw

Grab ledge and refill end-piece material: ABS plastic; light gray (similar to RAL 7035)

Material chute material: aluminum; anodized

Grab container base material: sheet steel; RAL 7035 light gray

Dynamic sitting – ergonomic and functional

Ergonomic and healthy sitting on the job greatly enhances employee performance.

Regardless of whether you are working on a manual production line, in a clean room or at a final inspection workstation: Poor posture when carrying out your activities often leads to muscle, back, and joint problems, as well as circulation issues. This makes ergonomic seating all the more important. You can optimize the ergonomics of your workstations with functional swivel work chairs that are specifically adapted to the individual application. These chairs effectively cushion the physical strain caused by repetitive movements. They provide individual support for each employee to ensure a healthy posture throughout their shift. Increase your employees' well-being and productivity in the workplace and minimize sick days.

Main features of Rexroth swivel work chairs:

- ▶ The tapered backrest ensures optimal freedom of movement in the arm and shoulder area.
- ▶ The ergonomically designed seat provides optimum pelvic support. It has adjustable depth and tilt.
- ▶ All the adjustment options are easily accessible and can be made by simply pulling out the respective element.
- ▶ All swivel work chairs from Rexroth are equipped with a stable, five-arm star chair base. Low chairs are delivered with rollers and high models with sliders.
- ▶ The seat and backrest materials offer comfort, durability, and easy care.
- ▶ You also have the option to equip your chair with multi-adjusting armrests and a height-adjustable foot support or circular footrest.

80 Swivel work chairs
85 Accessories

Healthy siting – well-designed from the very start

Settings as individual as users

A work chair doesn't need to reveal at first glance how much sophisticated technology and medical expertise it contains. But it does need to perform the impressive feat of providing optimum seating comfort for every employee – whether slender or athletic, tall or short, light or heavy, young or old, fit or frail.

A variety of sophisticated details come together so that users can adjust the work chairs to meet their individual needs – from the foot support to the seat with multiple adjustment options, a backrest with lumbar support, and synchronous technology with weight regulation. MPS swivel work chairs from Rexroth promote ergonomic workstation seating, increase efficiency, and reduce illness-related absences.

Seat height and depth adjustment

- ▶ Adjustment of seat height to employee's height for good posture and circulation
- ▶ Setting an optimal seating position for a leg angle of 90 degrees
- ▶ Adjusting the chair to the leg length by changing the seat depth

Backrest height and seat tilt adjustment

- ▶ Optimal support function provided by individual backrest adjustment for different user body types
- ▶ Adjustable seat angle – for optimum pelvic support
- ▶ Support of an active, upright seating and working posture

Lumbar support

- ▶ Backrest with integrated lumbar support to relieve the extensor muscles in the lumbar region
- ▶ Upright seating for a relaxed posture

Dynamic seating – technology for the highest demands

Seated postures can only be healthy and ergonomic when coupled with movement. A good work chair supports these dynamics through innovative movement mechanisms. One key factor is switching between the front, center, and rear seating positions. MPS swivel work chairs from Rexroth are

equipped with a special synchronous technology that enables these posture changes, without any sacrifices in terms of the stabilizing backrest function. This provides optimal support and relief to the torso during all dynamic movement sequences while seated.

Synchronous technology with permanent contact

- ▶ Permanent contact between back and backrest for efficient back muscle support
- ▶ Adaptation to the movement sequences involved in posture changes through effective synchronized mechanisms
- ▶ Synchronized movement of backrest and seat for optimum interplay of the hip and knee joints

Weight regulation

- ▶ Integrated weight regulation for individual adaptation to body weight
- ▶ Adjusting the resistance of the backrest via mechanical handles
- ▶ Effective cushioning of vertebral strain when switching between forward or reclining positions

Reduce your stocks with an efficient material supply system

A well-structured and clearly organized material supply system generates transparency to help you reduce your stocks.

Rexroth's flow rack systems offer users in commerce, trades and industry a wide range of important benefits:

- ▶ Various conveyor tracks employing various conveyor media are able to transport all containers and weight classes safely and reliably.
- ▶ Simple conversion, attachment and expansion options future-proof your system.
- ▶ Ingenious details such as color-coded rollers for long-range inventory visualization (Kanban).
- ▶ The application of the FiFo principle reliably ensures that materials are used in the prescribed sequence.

XLean is the favorably priced alternative. The Lean system gives you the benefits of high flexibility and numerous combination options – colored rollers to code your stock or to help distinguish between good and reject parts. Slide rails are available as the conveyor medium for certain applications, such as when you have a steeper gradient.

For heavy loads or for moving blister packs or cardboard boxes, EcoFlow is your best choice.

The easiest way to order is to freely configure your flow rack system with your required dimensions and equipment. If you need even more flexibility, you can custom assemble your flow rack system from rack modules and individual components. All parts are designed to combine, so you can use the MTpro Layout Designer to put together your system any way you like.

The flow rack system and components are available as an ESD-conductive design suitable for use in electrostatic protected area (EPAs).

Flow rack systems

When designing your flow rack system, it is essential to know which materials will be supplied in what quantity and in which containers. The number of parts and containers, their type, their dimensions and their weight all need to be taken into account.

The load capacity of the flow racks depends on the selected parameters, the setup, the frame dimensions, and the shelves used and conveyor tracks used. The maximum load is 2000 kg.

Detailed information on permissible loads is available in the “Technical data” chapter and in *MTpro*.

The selected conveyor media and lateral guides determine how well your containers travel through the system. The available conveyor media are known as XLean, Lean and EcoFlow.

Besides the traditional form of material supply using material shelves, you can also combine rack components with workstations. The advantage of tracks over material shelves is that containers are supplied to users in a defined and

XLean	Lean	EcoFlow
		
 D28  D28SK	 D32  D32SK  GS  GS SK  RE45  RE45SK	
Cost-effective solution	Colored rollers for inventory visualization (Kanban)	Heavy loads, for blister packs and cardboard boxes

precise manner. The containers cannot slip or get swapped because the tracks are adjusted to the particular container being transported.

The conveyor tracks can likewise be custom assembled from individual components or ordered as a complete unit.

Ergonomics

The container weight, the type of activity involved and the overall strain placed on the worker during a shift are the key factors in ergonomically designing a flow rack system. During configuration you need to consider the different body sizes of your workers so that as many of them as possible can use the system effectively. You can use the national average as a guide.

The tracks should be horizontally and vertically spaced to leave a sufficient grab area. We recommend leaving 200 mm both above the container height and between the tracks.

MTpro For flow rack system design and planning, we recommend **MTpro**! See pages 12 and 13 for more information.

Recommended working heights:
 A: higher container weight, B: lower container weight
 C: occasional handling

◀ The flow racks can stand alone or be set up in combination with one another. Combining flow racks allows you to save both space and money.

◀ All flow rack systems are ESD-conductive and suitable for use in ESD-sensitive areas. All the connection elements are designed such that the anodized coating on the aluminum profiles is pierced to ensure ESD conductivity throughout the system without the need for risky additional wiring.

XLean flow rack

00127214

- ▶ Material supply in the supermarket or directly at the workstation
- ▶ Cost-effective solution with conveyor tracks consisting of steel profiles and plastic rollers
- ▶ Available as ESD-conductive version
- ▶ Version: fully assembled or as a kit for self-assembly
- ▶ Allows for the addition of any desired modules, including cross ties and conveyor tracks as well as individual components

For workstation design and planning, we recommend MTpro! See pages 12 and 13 for more information.

Lean – accessories

- ▶ **Flexible bridge (A)** for the ergonomic supply of containers in the flow rack system or at the workstation. The container is stopped at the flexible bridge and then manually moved to the ergonomic removal position. Maximum inclination (a_{\max}) compared to horizontal:
 - With tubular cross tie: $a_{\max} = 40^\circ$
 - With double tubular cross tie: $a_{\max} = 30^\circ$
- ▶ **Brake (B)** for bringing containers to a gentle stop
- ▶ **Tube clip (C)** for fastening conveyor tracks onto the tubular cross tie. Increased stability
- ▶ **Holder for double tubular cross tie (D)** for connecting conveyor track and double tubular cross tie. Increased stability

	ESD	ESD No.
A Flexible bridge	20	3 842 537 951
B D32/37.5 brake	20	 3 842 537 948
D32/50, D32SK/50 brake	20	 3 842 532 881

D Holder for double tubular cross tie	20	3 842 537 720

Lateral guide application

- ▶ For retrofitting a lateral guide to the XLean, Lean and EcoFlow conveyor tracks
- ▶ For assembly elements, see “Components” section (page 176)

Reinforcement application

- ▶ For constructing flow racks with increased stability
- ▶ Rack loads up to 2000 kg
- ▶ For assembly elements, see “Components” section (page 176)

Insertion aid application

- ▶ Helps logisticians to insert material containers onto a conveyor track
- ▶ Quick and easy insertion
- ▶ For assembly elements, see “Components” section (page 176)

Transport guide

- ▶ Guide can be retrofitted onto XLean and Lean conveyor tracks
- ▶ Can be combined with all XLean and Lean conveyor media
- ▶ The T-shaped cross section allows both sides to be used as a lateral guide and a slide rail
- ▶ Use of both sides means lower space requirements
- ▶ Can be lowered underneath the conveyor track by turning the transport guide by 180°
- ▶ Mount for increased stability

Cross ties – components

Tubular cross tie (RT)

- ▶ Space-saving, visually appealing design

Tubular cross tie with bracket (RTW)

- ▶ Use of brackets makes for easy assembly
- ▶ Elongated hole for longitudinal compensation (± 3 mm tolerance)

Profile cross tie (ST)

- ▶ Suitable for heavy loads
- ▶ Flexible usage thanks to integrated 10 mm slot

Double tubular cross tie (DRT)

- ▶ Suitable for heavy loads
- ▶ Use of brackets makes for easy assembly
- ▶ Elongated hole for longitudinal compensation (± 3 mm tolerance)

EcoShape – the tubular framing system for new dimensions

With EcoShape, you can build custom structures that require very few components. Planning is easy, too, not just due to the new *MTpro* design software and the ability to make virtually any connection with just a few standard parts.

The 19 standard components are designed in accordance with the poka yoke principle, making them quick to assemble and prohibiting any faulty connections. The assembly line can be improved and expanded at any time in line with the kaizen philosophy.

The system allows you to quickly and economically custom plan and build flow racks, material shuttles, workstations and any other frame systems to meet your specific needs from just a few standard components.

- ▶ Two aluminum tubular profiles give your construction the required stability.
- ▶ With just five connectors, you can create any connection between two EcoShape profiles – parallel, perpendicular, or at any desired angle.
- ▶ All of the connectors establish a positive interlocking connection between the profiles for a secure fit.
- ▶ The connection elements allow for a length tolerance, greatly facilitating cut-to-size and assembly work.
- ▶ The new Variofix blocks let you securely attach surface elements quickly and inexpensively.
- ▶ The combination with Rexroth's modular aluminum framing system enables solutions for handling heavy loads.
- ▶ EcoShape can be combined with the range of components from the Manual Production Systems (MPS) line. You can use this versatility to expand system functionality, for example in the area of ergonomics.

120 Round tubes
121 Connectors
124 Adapters

EcoShape

EcoShape stands for versatility.
With EcoShape, you are ready for any challenge.

- ▶ The ability to combine all components with one another gives you great flexibility with just a few components.
- ▶ The tubes and connectors will neither rust nor wear, making them ideal for long-term use and for reuse in new systems.
- ▶ For even greater stability, you can combine EcoShape with the modular aluminum framing system.

With the aid of just 32 EcoShape components, you can achieve continuous improvement (kaizen) and quickly and economically adapt existing systems to new demands on site.

All EcoShape systems are ESD-conductive and suitable for use in ESD-sensitive areas. All the connection elements are designed such that the anodized coating on the aluminum profiles is pierced to ensure ESD conductivity throughout

the system without the need for risky additional wiring. No further ESD elements are required – with EcoShape you have everything in a single package.

Ergonomics

The combination of lean production and ergonomics results in an unbeatable strategy to help you achieve short production runs and reduced costs. EcoShape unites low investment expenditure with high flexibility and quality, including in the area of ergonomics. The ergonomic accessories found in the MPS program can also be used with all EcoShape workstations and flow rack systems.

00137052

00137051

00137056

For designing and planning EcoShape tubular framing systems, we recommend *MTpro*! See pages 12 and 13 for more information.

◀ Aluminum is environmentally friendly and up to 99% recyclable. Aluminum profiles are reusable.

EcoShape

- ▶ All connectors can be combined with the EcoShape D28L and D28L, N10 and D28 round tubes (see “Flow rack systems”, page 88).
- ▶ Integrated poka yoke system for easy and secure connector installation
 - Anti-torsion element for secure joints
 - Form-fit connection

- ▶ All connectors are suitable for setting up ESD-conductive systems.

Material: diecast zinc

Scope of delivery: includes fastening material

- ▶ Impact protector for D28 and D28L round tubes

Impact protector	L (mm)	No.
	2000 10	3 842 544 637

Material: PE-LD; gray

- ▶ For designing simple tool holders

D50 ring	No.
	3 842 548 131

Material: steel; nickel-plated

Spring hook	No.
	0 842 901 309

Material: steel; galvanized

- Non-slip design of flow racks and stands

D28 rubber foot	ESD	No.	FS
		20	3 842 548 128 FS16

Material: NR/SBR (conductive); black

- To stop material shuttles ergonomically at just one point
- All-purpose option for attachment to different round tubes and profile cross-sections
- Clamping travel stopper: 34 mm

D28L, N10 stopper	No.	FS
	3 842 548 132	4x FS17, 2x FS18

Material: Stopper: stainless steel; EPDM
Attachment plate: aluminum

Scope of delivery: includes fastening material (FS)

EcoFlow – manual linking elements bring everything closer

Manual linkage of workstations with EcoFlow eases worker strain because products and workpiece pallets are conveyed on manual slide sections.

Assembly line operations are normally divided among multiple workstations. Besides making these workstations ergonomic, assembly line designers must also ensure that the various jobs and workstations are linked together in a way that maximizes efficiency and economy. Workers do not have to carry loads. At the same time, investment in such linkage need not be expensive, since the EcoFlow conveyor tracks work without any electric drive systems or controllers.

You can procure these conveyor tracks either fully assembled or as single components for self-assembly. A range of conveyor media allows you to adapt the conveyor tracks in an ideal way to your goods: Cardboard boxes and blister packs are carried on plastic or steel full-width rollers, or you may

choose to use slide sections. Its high level of stability also makes EcoFlow ideal for transporting heavy loads.

To complete your system, you may add accessories such as stop gates for positioning materials at the workstation, or ball rollers for creating branch-offs and curves. All EcoFlow components are designed for use in combination with the products in Rexroth's MPS and modular aluminum framing programs.

The system is fully ESD-compatible and may be used in ESD-sensitive areas.

- 134 Conveyor tracks
- 136 Conveyor track components
- 140 Stop gates and return stops
- 141 Accessories

EcoFlow application examples

Build frames for roller sections or manual slide sections using Rexroth strut profiles and connectors.

Application 1: manual slide section

EcoFlow conveyor track

- ▶ For supplying materials to workstations and in flow rack systems
- ▶ For the manual linking of workstations
- ▶ Aluminum profile conveyor track
- ▶ Full-width rollers available in plastic, steel or stainless steel
- ▶ Recommended conveyor track width: BF = container width b + 5 mm
- ▶ Rail holders for suspending on tubular cross tie: Preferably used in flow rack systems or at workstations for supplying materials in the accessory upright
- ▶ Stop plates suitable for the manual linking of workstations
- ▶ Save money by choosing the larger roller distance R
- ▶ Steel conveyor medium available in ESD-conductive version.

Conveyor track with rail holders		3 842 998 258
A	Version	Disassembled, assembled
ESD	Conductivity	Yes, no
TM	Horizontal distance between tubular cross ties	355 ... 6000 mm
G	Gradient	0 ... 10% (recommended: 6%)

* 8 mm slot
** 10 mm slot

Roller mount (K)

- For fast and simple construction of conveyor tracks using strut profiles with 8 or 10 mm slot. Can also be used in the 10 mm slot of the EcoFlow section profile
- Suitable for retrofitting rollers without having to disassemble the frame. The roller distance is variable.

Scope of delivery: includes fastening material for 8 or 10 mm slot

Cap (L)

- Cap for EcoFlow section profile with guide profile

		No.
K Roller mount, 8 mm slot	10	3 842 535 667
Roller mount, 10 mm slot	10	3 842 535 668
L Cap	20	3 842 525 457

Ball roller (M)

- For creating branch-offs or curves

Housing material: steel; galvanized

Ball material: stainless steel

Transverse conveyor (N)

- For connecting EcoFlow transfer sections

Angle material: steel; galvanized

Ball material: stainless steel

Corner piece (O)

- For fastening EcoFlow transfer sections at same level

Material: PA; black, ESD-conductive

Stop (P)

- For gently stopping the workpiece pallet. Fastened to EcoFlow section profiles or strut profiles with 10 mm slot

Material: aluminum; anodized

Scope of delivery: includes fastening material for 10 mm slot

		ESD No.
M Ball roller	20	 3 842 541 008

EcoFlow accessories

Protective cover (A, B)

- Protective cover to shield the EcoFlow guide profile when loading the conveyor track. Select cover for border outside (BG = 0) or border inside (BG = 1)

Material: steel; galvanized

Scope of delivery: 2 protective covers; includes fastening material

Brake (C)

- Brake for gently bringing containers to a stop

Material: steel; galvanized

Corner pieces (D)

- Corner pieces for self-assembly of workpiece pallets
- For isolating parts from the pallet queue, well-defined guidance and stopping surfaces, good transition through curves and avoidance of edges where trapping may occur

Material: PA; ESD

Scope of delivery: 4 corner pieces; includes fastening material

Flexible bridge (E)

- Flexible bridge for easy material supply in the flow rack system. The container is stopped by a rail holder with stop and is moved manually to the inclined position
 - $a_{max} = 40^\circ$ (tubular cross tie)
 - $a_{max} = 30^\circ$ (double tubular cross tie)

Material: steel; galvanized

Scope of delivery: includes fastening material

	 ESD	No.

D Corner pieces for workpiece pallets	Set 	3 842 536 054
E Flexible bridge	20	3 842 537 950

Systematic Kanban supply in production

Standardized material supply in production using defined delivery routes creates clarity and a high degree of transparency.

A primary objective of lean production systems is to minimize inventories while simultaneously increasing transparency. This reduces tied up capital and expedites parts to workers by eliminating search times.

Material shuttles

The use of material shuttles at workstations is particularly beneficial for workstations that deal with a high degree of variance; they are the alternative to fixed-installation material supply systems.

Prefabricated material shuttles can be replaced quickly and easily. This cuts the waste that occurs in the form of waiting and conversion times.

The Logistics material shuttle is used to link the supermarket with the workstation and to pick the materials needed at a workstation or for a work step.

You can order material shuttles as a complete system with variable dimensions and equipment or as a standard material shuttle. You can also procure individual components to assemble special constructions to meet your specific requirements.

FiFo station

Complying with the FiFo principle makes possible easy traceability in the case of material faults or disturbances in the process.

The FiFo station can be compared to a supermarket for floor rollers, material shuttles and commissioning shuttles. The supermarket's size can be adjusted easily and quickly to your individual needs through the modular construction of the rail system.

The FiFo station supports the 5S principles for material supply.

MTpro

**For simple and efficient assembly line planning,
we recommend using MTpro!
See pages 12 and 13 for more information.**

- 144 Workstation material shuttles
- 146 Logistics material shuttles
- 150 FiFo station

Workstation material shuttle

00137599

- ▶ Parts positioned within grab area of workstation
- ▶ Short conversion times with quick exchange of pre-picked material shuttles
- ▶ Can be equipped and sized to meet specific requirements
- ▶ Available as ESD-conductive version
- ▶ Version: fully assembled or as a kit for self-assembly
- ▶ Optional information board for supplying information directly at location
- ▶ Adjustable material shelf height, offset, and tilt to ensure ergonomic grabbing
- ▶ Basic material shelves (see pages 26, 179) includes lettering clip; various plates available
- ▶ Castors: ball bearing, with locking mechanism
- ▶ Can be used in combination with workstation (see page 22) or for supplying materials in conjunction with the manual linking system EcoFlow

Accessories:

- ▶ Rubber profile to protect against heavy impacts when positioning the material shuttle (see page 28)
- ▶ Swivel fastening for tilting the material shelf (see page 178)

MTpro For workstation design and planning, we recommend **MTpro!** See pages 12 and 13 for more information.

	1000	610	410	⚡	3 842 518 121

Applications

Material shuttle with angle profile

- ▶ To hold workpiece pallets and containers, including small parts containers

Material shuttle with suspension profile

- ▶ To hold grab containers for commissioning, transport and supply of small parts

Further material shuttle variants can be custom-built to meet specific requirements. The individual components are described in the “Components” section (see page 176).

FiFo station

00137599

- ▶ Standardized delivery routes for clearly organized and highly transparent production operations
 - ▶ Clear visualization to help minimize inventories
 - ▶ Implementation of the Kanban principle
 - ▶ Structured material supply system with efficient, well-defined processes to help find required materials fast
 - ▶ Easy tracing of faults and malfunctions through observation of the FiFo principle
 - ▶ Modular system lets you adapt the layout to your needs and to your space
- ▶ Flow rack systems can be integrated to save space. The flow rack is set up on the FiFo tracks, light parts are stored in the flow rack and heavy parts on floor rollers or material shuttles in the FiFo station.
 - ▶ Information supplied by attaching information boards
 - ▶ A transverse profile can be installed to set a height limit for materials

Components

- ▶ Guide rail fastened to floor using adhesive strips, end caps may also be screwed in place (if required)
- ▶ Adapter for connecting two guide rails, or a guide rail with a 30x30 profile
- ▶ Large end caps for integrating a 30x30 profile for use in installing flow rack systems, information boards and height limits. Since the guide rails are flat-sided, setup can be done using a profile of width 45.

Guide rail color: yellow

Case lifters help keep sick days down

Workstation designers are increasingly aware of the importance of ergonomics on the job.

Musculoskeletal disorders are among the primary causes for worker absences. In order to sustainably reduce times absent due to sickness and disability, it is important to minimize the strain placed on workers' bodies. Workers who continuously and repetitively lift and lower loads are especially prone to incorrect work posture that can lead to overexertion. Bending of the torso (below 800 mm) places a disproportionate strain on the human body.

The electric case lifter literally takes the load off employees' backs by doing the raising and lowering for them. It serves to bring workpieces into the correct grab area or to deliver finished products directly to floor rollers for further transport. In particular where heavy loads are involved, the case lifter is a great help in supplying materials to the workstation. It can also be positioned at the beginning or end of a conveyor track to feed or remove conveyed items.

Moreover, it slashes the time required for parts supply and removal by up to 68% (MTM – Method of Time Measurement). Employees can then concentrate their efforts on their value-adding assembly work.

Rexroth's new case lifter offers you many advantages, including the following:

- ▶ Compared with manual mode, automatic mode further reduces waiting times
- ▶ In addition to stationary operation, rollers also allow for semi-mobile use
- ▶ Suitable for loads up to 220 kg
- ▶ Space-saving thanks to the compact, closed aluminum housing
- ▶ Suitable for use in ESD-sensitive areas
- ▶ The 10 mm slot enables simple mounting of components from the Basic Mechanic Elements modular system

154 Electric case lifter

156 Accessories

Electric case lifters

- ▶ Ergonomic parts supply at the workstation
- ▶ Operating mode:
 - Manual: lifting and lowering through hand switch actuation. Suitable for use with Basic and Comfort hand switches
 - Automatic: automatic lifting and lowering. Suitable for use with Comfort hand switches in conjunction with Comfort sensor unit (retrofit possible)
- ▶ Rollers for semi-mobile use at various workstations
- ▶ ESD version for use in ESD-sensitive areas
- ▶ The 10 mm slot enables simple mounting of components from the Basic Mechanic Elements modular system
- ▶ Easy setup without electrician; connection via HD mains cable (see page 155) or connecting cable (see page 49)

Required accessories: Basic hand switch or Comfort hand switch + Comfort sensor unit; mains cable
 Recommended accessories: attachment plate, forks, suspension lug (see pages 156, 157)

Technical data

- ▶ Permissible load F_{max} : 2200 N
- ▶ Lifting velocity: 25 mm/s
- ▶ Operating time (OT): 20%
- ▶ Connection: ~230 V/max. 16 A
- ▶ IP rating: IP 40 IEC 529

More transparency with ActiveCockpit for optimized production

Lean production made easy:

Even in its basic version, the ActiveCockpit software offers a broad range of options for improving and making manufacturing processes more efficient.

All relevant data is processed with transparency and user-friendliness – ideal conditions for rapidly identifying and exploiting optimization potential.

Industry 4.0: production and IT growing together

Industry 4.0 is the next major step for manufacturing plants. The dialog between man, machine and product plays an ever-increasing role in technical implementation. The fusion of production IT and enterprise IT, the synchronization of processes, and machines that automatically make decisions in real time all allow for efficient and customized manufacturing.

As the leading supplier of Industry 4.0 solutions, Bosch Rexroth is using its own application experience in production – including for the interactive touchscreens used for the ActiveCockpit industrial software. As a trendsetting platform for production, this solution brings all the relevant data directly to the line.

More work flow efficiency by consolidating information

A look at a typical manufacturing process shows how many different sources of data workers have to take into account: They look up information on stocks and pending orders on the computer during production planning. Statuses and quality information are manually documented on various boards. Everyone writes down deadlines. For line management and the various machines, users have to have mastered the user interfaces and manually start processes.

The ActiveCockpit software uses open interfaces to continuously record, process and filter manufacturing data from existing software landscapes and various data sources.

Current quality and production figures are displayed on the touchscreen in real time and can be analyzed directly on site. This gives everyone involved at the plant the most up-to-date information to serve as the basis for improvements and new standards. Deviations from specified production parameters are displayed in the key figures and immediately initiate the improvement process.

Transparent and user-friendly

With this system, all relevant manufacturing data can be shown at any time – from availability to production times, to production numbers. This not only saves time and money, it also increases productivity and competitiveness. ActiveCockpit is fully interactive: whiteboard, escalation, e-mail, explorer and up-to-mobile functions help decisions be made more efficiently.

ActiveCockpit – software

Basic package and licenses

Server and database requirements

- ▶ Operating system: Windows 2012 (or later)
- ▶ CPU: min. dual-core (quad-core recommended)
- ▶ Memory: min. 8 GB (16 GB recommended)
- ▶ Hard drive: 2 GB for ActiveCockpit + > 50 GB for data
- ▶ Network connection: Gigabit LAN
- ▶ Software: Microsoft Office 2007 (or later)

Client requirements

- ▶ Operating system: Windows 7 (or later)
- ▶ Memory: > 4 GB
- ▶ CPU: min. Intel Core i5 3rd Gen
- ▶ Software: Microsoft Office 2007 (or later)
- ▶ Network: tethered Gigabit LAN
- ▶ Graphics card: Ultra HD-capable, e.g.,: ATI Radeon 7850 or NVIDIA Geforce GTX 760
- ▶ Cable: 4K-capable HDMI cable

ActiveCockpit basic package

- ▶ Interactive communications platform for the manufacturing industry
- ▶ Processing and display of manufacturing data in real time
- ▶ Extension of web-based basic software package with applications
- ▶ Digitalization of shop-floor data via Desklinc
- ▶ Structured and documented team meetings
- ▶ Customer-oriented configuration thanks to intuitive web application
- ▶ Automatic minuting function saves time
- ▶ Space-saving

Features:

- ▶ Web-based ActiveCockpit software on annual lease
- ▶ Licenses can be purchased for additional users

Basic package contains the following:

- ▶ Modules: Dashboard, Views, Meetings, Notes, Whiteboard, Q-and-S, Desklinc
- ▶ 10x concurrent user license
- ▶ 1x device license
- ▶ 1x administrator rights

ActiveCockpit basic package	No.
1-year lease	3 842 558 253
Lease for another 12 months	3 842 558 276
ActiveCockpit licenses	No.
10 concurrent users	3 842 557 110
1 device	3 842 557 111

Description of ActiveCockpit basic package functions

Desklink

- ▶ Fast digitization of data from different file formats, e.g., Excel, Word, PowerPoint
- ▶ Data is updated automatically
- ▶ Interactive widget status change

Dashboard

- ▶ All relevant data digitally available on site
- ▶ Information from different file formats can be displayed, e.g., Excel, Powerpoint, video
- ▶ Accessible to all employees

Views

- ▶ Fast compilation of data and documents, e.g., for improvement meetings
- ▶ Individual assignment of user authorizations, including read, edit, delete
- ▶ Information can be displayed and used across departments, documents are updated via Desklink
- ▶ Filter and display relevant information without editing the original file

Meetings

- ▶ Operator can assign individual names for each plant
- ▶ Documentation of meetings with freely selectable components and individually definable structure
- ▶ Automatic minuting with all relevant information and attachments to the discussed topics

Notes and whiteboard functionality

- ▶ Note function for communicating with colleagues or for escalating during the meeting
- ▶ Annotation function via touchscreen for marking, commenting directly in ActiveCockpit
- ▶ Display and transmit relevant information. In case of malfunctions, a photo can be taken via tablet and forwarded to ActiveCockpit for evaluation

Q-and-S module

- ▶ Entry and management of quality and safety deviations
- ▶ Display of the current status in the form of a Q for quality or an S for safety
- ▶ Overview of quality and safety status for all months by year
- ▶ Values can be transferred back to ERP/MES systems via Industry 4.0 interface

Data security:

- ▶ All data including e-mail dispatch are transmitted encrypted
- ▶ All user inputs are checked for correctness and malicious code
- ▶ Application uses defensive programming methods that review all entries in advance
- ▶ A defined role and authorization concept controls access to the system and prevents errors during data entry
- ▶ All passwords are stored encrypted in the database to prevent disclosure in case database is compromised.
- ▶ Indirect database queries eliminate potential attacks (SQL injections)

ActiveCockpit – application software

Area Manager

- ▶ Hierarchical user and content management
- ▶ Reduced need for central administrators
- ▶ Decentralized user and content management “on site”
- ▶ Organizational separation promotes clarity and better delineates responsibilities
- ▶ Releasing widgets between areas facilitates inter-hierarchical work with content
- ▶ Separate dashboards for every area can be configured individually

Area Manager	No.
1-year lease	3 842 558 266
Lease for another 12 months	3 842 558 267

Deviation Manager

- ▶ Data import from MES via a web service for easy processing
- ▶ Deviation classification and tracking
- ▶ Classified deviations displayed clearly (status, priority, revisit) for employees
- ▶ Close remedied incidents or set to revisit
- ▶ Select between “Moderator” and “My Incidents” UIs

Deviation Manager	No.
1-year lease per area	3 842 558 260
Lease for another year (per area)	3 842 558 261

Staff Manager

- ▶ Quicker reconciliation and exchange of personnel capacity
- ▶ Intuitive and visual ticket system for date tracking
- ▶ Hierarchical access to plant areas via work areas and the activities included in them.
- ▶ Export of requirements for staffing with external capacity/for processing in external systems
- ▶ Intuitive configuration in admin UI

Staff Manager	No.
1-year lease per area	3 842 558 258
Lease for another year (per area)	3 842 558 259

Card Identification

- ▶ App for easy system login via employee ID

Required accessories: Card reader (see page 170)

Recommended accessories: Registration cards

Card Identification	No.
1-year lease (per card reader)	3 842 558 273
Lease for another year (per card reader)	3 842 558 274

App Connector

- ▶ For integrating in-house applications into ActiveCockpit
- ▶ Individual functionality expansion for adding customer apps to the ActiveCockpit platform

App Connector	No.
1-year lease	3 842 558 264
Lease for another 12 months	3 842 558 265

WebFrame

- ▶ Customer-specific web applications integrated as widgets
- ▶ Third-party web applications embedded via URL

WebFrame	No.
1-year lease per area	3 842 558 254
Lease for another year (per area)	3 842 558 255

CheckIn WebFrame

- ▶ Image display with caption
- ▶ Display refreshed regularly
- ▶ Clicking on the report opens the web application
- ▶ User rights automatically given to third-party web applications
- ▶ User-friendly admin UI for configuring links and authorizations

Requirements

- ▶ Target application must provide a web service for authentication
- ▶ Target application must run in the same domain or sub-domain as ActiveCockpit
- ▶ Target application must provide static links to images as well as the proper Deeplink

CheckIn WebFrame	No.
1-year lease per area	3 842 558 262
Lease for another year (per area)	3 842 558 263

ActiveCockpit – extensions for customers

Bosch Rexroth offers its clients project-specific services that go far beyond just engineering services. Supported services include:

- ▶ Start-up, training
- ▶ App Diagram
 - Live data visualization (e.g., KPIs) directly from back end systems
 - Tables and diagrams made quick and easy
 - Different data sources from which to choose
 - Freely configurable pull (periodic) or push (immediately upon signal from source system) refresh rate
 - Process optimization apps, such as Process Quality Manager or Production Performance Manager

ActiveCockpit – hardware

Monitor (A)

- ▶ Touchscreen monitor as I/O device for the ActiveCockpit software
- ▶ HDMI and USB connection
- ▶ 65" ultra HD LED
- ▶ Resolution: 3840x2160
- ▶ Refresh rate: 60 Hz
- ▶ Glass panel: 4 mm, Moh 7
- ▶ Touch module: IR module
- ▶ Angle of vision: 178°
- ▶ Power consumption: 248 W
- ▶ CE/FCC/IC/RCM

Requirements:

- ▶ Personal computer (not included)
- ▶ Network: tethered Gigabit LAN
- ▶ Graphics card: Ultra HD-capable, e.g.,: ATI Radeon 7850 or NVIDIA Geforce GTX 760
- ▶ Cable: 4K-capable HDMI cable

65" ultra HD touchscreen AC monitor	Country	Voltage (V)/ frequency (Hz)	No.
	EU	100-240 V/50; 60 Hz	3 842 557 139

Frame (B)

- ▶ Frame for 65" ultra HD touchscreen AC monitor
- ▶ Includes label
- ▶ Card reader mount required

Material: polycarbonate; white

Scope of delivery: includes fastening material for 3 842 557 139

Frame	Thickness (mm)	No.
	10	3 842 558 278

Base (C)

- ▶ Electrically height-adjustable
- ▶ Mobile
- ▶ Lift: 660 mm from 1192 mm to 1852 mm
- ▶ Floor dimensions: 570x630 mm
- ▶ Roller diameter: 125 mm
- ▶ Operating time: 10%

Material: steel

Lift color: RAL 9006

Base plate color: RAL 9005

Base	Country	Voltage (V)/ current (A)	No.
	EU	100-240 V/16 A	3 842 554 209

Card reader

RFID card reader for logging into board with registration card

- ▶ Increases security when logging onto a 65" touchscreen
- ▶ 3-LED status indicator
- ▶ USB 2.0 connection
- ▶ Cable length: 2 m
- ▶ Dimensions: 112x54x27 mm
- ▶ Can be mounted on white frame (see page 169)
- ▶ IP 40
- ▶ Compatible with existing plant IDs (have validated by your Rexroth consultant)

Required accessories: Card Identification app

Card reader	No.
	3 842 558 271

Card

- ▶ Registration card for employee identification

Required accessories: Card reader

Card	No.
	3 842 558 272

Better employee information for increased transparency and quality

A key element of lean production is the visual on-site presentation of activities, goals and results.

Infoboards can be used to provide important information such as production figures and agreed goals, but also team overviews and job responsibilities within a department. Workers thus have access to information on-site and at any time.

The infoboards are fully suitable for industrial use due to their stable, robust construction.

There are three versions available:

- ▶ For pins with matted surface, can be used as a projection screen.
- ▶ Perforated plate for magnets and screws.
- ▶ Magnetic, can be written on both sides for board markers.

The boards are made up of modules. The base module is called the Wall infoboard, which becomes the Economic infoboard when the stand is added. The Mobile infoboard has rollers so it can be pushed easily as well as a tilting surface for ergonomic writing.

Multiple infoboards can be combined to set up CIP corners and discussion islands.

174 Infoboards
175 Accessories

00127194

Wall infoboard

Accessories: bracket for wall mounting (see page 175)

	h x b (mm)	No.
A Wall infoboard – pin	1484x1234	3 842 515 775
B Wall infoboard – magnet	1184x1484	3 842 516 405
C Wall infoboard – magnet marker	1184x1484	3 842 515 776

00127193

Economic infoboard

► Can be retrofitted with rollers for mobile applications

Accessories: roller set (see page 175)

	h x b (mm)	No.
A Economic infoboard – pin	1484x1234	3 842 515 771
B Economic infoboard – magnet	1184x1484	3 842 516 406
C Economic infoboard – magnet marker	1184x1484	3 842 515 772

00120888

00119999

00120001

Mobile infoboard

- ▶ Tilting work surface for good ergonomic posture
- ▶ With locking rollers

	h x b (mm)	No.
A	Mobile infoboard – 1484x1234 pin	3 842 515 773
B	Mobile infoboard – 1184x1484 magnet	3 842 516 407
C	Mobile infoboard – 1184x1484 magnet marker	3 842 515 774

00120005

Infoboard accessories

	ESD No.
Roller set for Economic infoboard	Set 3 842 536 129
Bracket for Wall infoboard	3 842 515 547

Continuous improvement and self-assembly of your systems

In addition to the systems and modules on offer, you can also choose to build your own system from individual components.

This chapter has been compiled to provide you with a summary of the components you will need for the different parts of your system.

The expansion and continuous improvement of existing systems is the key to long-term success. Employees experience and learn new things every day. And this knowledge should be quickly integrated into your assembly systems. Our MPS program is the modular system you need to achieve continuous improvement.

Again and again, new product variants or new customer demands compel you to rethink and revise your existing system. Make this job easier for yourself by using the Manual Production System and its components.

You will also find a short extract from other Rexroth offerings here including Basic Mechanic Elements.

For simple and efficient planning and layout we recommend using *MTpro*.

- 178 Material shelves
- 180 Conveyor level
- 181 Accessory upright
- 182 Reinforcements, lateral guides
- 183 Hanger
- 184 Grab containers, tool shelves, suspension profiles
- 185 Supporting arms
- 187 Material shuttles
- 188 Consoles, foundation brackets, table top supports

Fraunhofer
TESTED[®]
DEVICE
ESD-Profile Assemblies
Report No. BO 0506-328

We believe in safety first! The load limits given in this section have been empirically tested in our labs under realistic work conditions. All of our products are developed in compliance with legal regulations and accepted engineering practices. Our flow rack systems, for example, fulfill the requirements of the Guidelines for Storage Systems issued by the relevant employer liability insurer.

In addition, we commission independent institutes to carry out various tests. The ESD safety of our workstation system and our XLean, Lean and EcoFlow flow rack systems have all been analyzed by the Fraunhofer Institute for Manufacturing Engineering and Automation (IPA). The IPA certifi-

cates of compliance with the requirements of ESD standards DIN EN 61340-5-1 and DIN EN 61340-4-1 are available for inspection at any time.

More in-depth technical information is provided in the operating and assembly instructions included with each product. These instructions are also available in *MTpro* or as Internet downloads.

- 192 Workstations and workstation accessories

Workstations and workstation accessories

BA (mm)	FU	F _{max} (N)	F _{max} (N)	F _{max} (N)	F _{max} (N)
≤ 1500	GF	2000	4000	2000	4000
	LR	2000	2400	2000	3000
> 1500	GF	1500	2000	1500	2000
	LR	1500	2000	1500	2000

	Point load	BA	Width
		FU	Foot type
	Distributed load	GF	Leveling foot
		LR	Castor

Workstation module

Bearing load for height-adjustable workstation where BA = 1000 mm. The bearing load decreases as the width BA increases. Standard load version LV = 1; heavy load version LV = 2; H3 = 0

Material supply module (accessory upright)

Bearing load for height adjustable material supply where BA = 1000 mm and H3 = 1200 mm. Standard load version LV = 4; heavy load version LV = 5

Workstations

Point and distributed loads for workstations

In configurable workstations, these values are dependent on the width (BA), foot design (FU) and workstation design. All values apply to desk and box types.

3 842 998 110 (see page 22)

Point and distributed loads for height-adjustable workstations

3 842 998 350 (see page 18)

The load carrying capacity of the workstation and material supply (accessory upright) modules is dependent on the selected load version (LV) and the respective design.

F_B = Max. load (uniformly distributed load)

F_T = Max. bearing load of base frame

F_A = System weight of fixtures

$$F_B = F_T - F_A$$

Load version type	Number of lift modules	
	Table	Accessory upright
LV=1	2	0
LV=2	4	0
LV=3	2	2
LV=4	4	2
LV=5	2	4
LV=6	4	4

The maximum load is calculated from the bearing load of the base frame minus the system weight of the fixtures (table top, brackets, material shelves, etc.).

In order to precisely determine the maximum load of your individual workstation system, please use MTpro!

Parallelism

3 842 993 063/L (see page 184, 185, 187, 212)

3 842 554 157 (see page 184, 185, 187, 212)

Diagram 1: Permissible load for the suspension profile

Workstation hanger

Without accessory upright, with accessory upright, with reinforced strut extension (see page 183)

Example for determining F_{max}

Determination of load for the strut extension:

P = 45 mm
 T2 = 400 mm
 Diag. 2 → F = 380 N

Determination of load for hanger:

B_U = 1000 mm
 Diag. 3 → F = 580 N

The maximum permissible load F_{max} is the lower of the two load values. F_{max} = 380 N

Diagram 2: Permissible load for the strut extension

Diagram 3: Permissible load for the hanger
